J. C. RIETZ,

Actuary of the Midland Mutual Life Insurance Company and Assistant Professor of Mathematics, Ohio State University

A teachable elementary course in the application of mathematics to financial problems. The material for the book has been tested in the teaching of such courses at three large universities.

"It seems to me that the book presents the elements of this subject in a clear and attractive form and that by its help, anyone at all interested in these questions can easily gain such information about them as would ordinarily be needed in the larger business transactions."
